

PROPERTY ADDRESS of NON-INTERFERENCE AGREEMENT

As the owner/occupant of the above-referenced property, I understand that a Radon Screening Test is being performed by **Northside Radon Testing, LLC** with my permission.

I understand and agree to maintain EPA defined "closed-house" conditions during this test. I understand that all windows, exterior doors, and garage(s) should be kept closed as much as possible 12 hours before starting the test and throughout the test period, except for momentary entry and exit.

I understand that I must not operate high volume attic or window fans, and any other mechanical system that impacts the air quality or ventilation by the introduction of a fresh air supply, 12 hours prior to or during the measurement period.

I understand that the operation of the furnace and a central air-conditioning system that recycles indoor air is permissible during the test period.

I understand that fireplaces should not be used, but wood stoves are allowable providing the stove doors are closed.

I understand that alteration of the EPA defined "closed-house" conditions will interfere with the validity of the test results and may result in legal liability for me.

I agree not to tamper with the test devices during the measurement period, including but not limited to moving or covering the test device, or altering the measurement environment.

I authorize **Northside Radon Testing, LLC** to inspect this property prior to and during the test period and to disclose the test results to the party for whom this Radon Screening Measurement is being conducted.

I understand that not following the above requirements will result in the test being voided and that subsequent testing charges will be incurred.

I confirm that I have read and understand this statement by my signature below.
